

General: The Bosco collection of rectified porcelain stoneware planks and inlaid decors is a perfect replica of the beautiful German forest oak trees. Rich in warmth and depth of colour, Bosco represents strength and durability - giving any environment a sense of purpose and being.

The Natural surface finish is soft under foot, and perfect for all internal areas, while the Grip surface finish is anti-slip and perfect for wet areas and external landscaping solutions. There is even a 20mm thick paver option that can be used in heavy duty external areas - as a paver or raised flooring solution.

To complete the series there is even a beautiful parquetry decor which replicates inlaid timber in 802x802mm panels.

Applications: All commercial & residential applications for both inside & out. Create various edge detailing and laminations for steps, pool surrounds/coping, as well as custom designs.
